

All-In-One Bulk System

STREAMLINED BYOC WEIGH LABELLING SOLUTION
FOR BULK PRODUCT RETAIL

WEIGHING SCALES

www.wedderburn.com.au

DIGI's All-In-One Bulk System offers a no-fuss, tare-free and streamlined solution for zero-waste bulk product retailing.

DIGI's tare-free streamlined solution for bulk product retailing accelerates efficiency, customer engagement and packaging-free choices available.

With real-time trade-approved weighing, and options of Hopper, Scoop or Liquid Scales, customers can use their own reusable containers across a greater range of bulk product from pantry staples to spices, herbs and even vinegars.

With the All-In-One Bulk System, weight and pricing of the dispensed product is automatically displayed on the console's screen ready for label printing. Eliminating the need for an operator to select a PLU helps reduce errors and simplifies the shopping process.

The innovative system also eliminates the need for containers to be tared as product is weighed prior to being dispensed into the customer's container.

Streamlined Operation

- ✓ Auto PLU Callup - no need to search for PLUs
- ✓ No container tare required
- ✓ Multiple shoppers can operate at the same time

Flexible Configuration

Each setup consists of a single SM-6000 Printer Console that can be linked to multiple Hopper, Scoop and Liquid Scales, allowing retailers to mix and match different types of dispensers while offering a wider selection of packaging-free products for bulk retailing.

Dispense • Scoop • Pour

This sustainable solution incorporates 3 types of scales to accommodate a wider range of product and container-filling methods, and can be added to over time.

All-In-One Bulk System

Sustainable Operations

Apart from making plastic-free bulk shopping a reality, this system combines linerless labelling with low power consumption to help retailers reduce waste and carbon emissions while establishing climate-friendly operations.

Zero Waste

- ✓ Packaging-free shopping
- ✓ Linerless labelling
- ✓ Low power consumption
- ✓ Customers can buy the quantity they need

Electronic Product Labels

DIGI's Info Tag is an enterprise-grade electronic shelf label that grants pricing automation via wireless updates. They can be easily incorporated on the Hopper, Scoop and Liquid Scales to display product or promotional information with timely and accurate price updates.

Electronic Info Tags

Accurate, versatile and durable, DIGI's electronic shelf labels set exceptional standards in customer experience and store efficiency with accurate and timely price updates and shopper engagement.

SYSTEM SUMMARY

- streamlined tare-free solution for bulk product retailing
- NMI approved Hopper, Scoop and Pour Scales available
- SM-6000 Printer Console with linerless labelling
- packaging-free shopping
- smart design eliminates PLU search requirement
- no taring of container weight needed
- multiple shoppers can operate simultaneously
- item's weight and price shown in real time
- customers can purchase the quantity they need reducing waste
- hygienic product handling
